CONTENTS

No. 1, JULY, 1945

The Technique and Practical Applications of the Complement-Fixation Test for Diagnosis of Infection with Encephalitis Viruses. J. Casals 1
Biochemical Variants of *Shigella alkalescens* Types I and II. Erwin Neter and Elizabeth C. Deuchler 7
The Specificity of the Second Stage of Bacterial Agglutination and Hemagglutination. Harold A. Abramson, William C. Boyd, Sanford B. Hooker, Pricilla M. Porter, and Marjorie A. Purnell 15
A Study of Sulfapyridine Resistance in Pneumococci. Sophie Spicer 23
A Turbidimetric Method of Following Cell Multiplication Within Warburg Flasks. Richard J. Henry and Jane E. Henry 31
The Influence of Amino Acids on the Growth of *Leptospira canicola*. Meridian R. Greene 39
An Unidentified Pleuropneumonialike Organism Isolated During Passages in Chick Embryos. William Van Herick and Monroe D. Eaton 47
A Practical Liquid Medium for Cultivation of *Trypanosoma cruzi* in Large Volumes. Paul A. Little and Y. Subbarow 57
The Inactivation of Antibacterial Agents and their Mechanism of Action. C. J. Cavallito, John Hays Bailey, T. H. Haskell, J. R. McCormick, and W. F. Warner 61
The Production of Plaques by *Rhizobium* Bacteriophage in Poured Plates and Its Value as a Counting Method. J. Kleczkowska 71
A Quantitative Study of the Interaction of Bacteriophage with *Rhizobium* Using the Technique of Poured Plates. J. Kleczkowska 81
Tyrosine Decarboxylase. II. Pyridoxine-deficient Medium for Apoenzyme Production. W. D. Bellamy and I. C. Gunsalus 95
A More Rapid Presumptive Test for Coliform Bacteria in Water. Leslie A. Sandholzer and Freeman H. Quimby 105
Growth Requirements and Metabolism of *Neisseria intracellularis*. N. Grossowicz ... 109
Notes:
Salmonella Grouping for the Average Laboratory. MacDonald Fulton 117
Preservation of *Leptospira icterohemorrhagiae in Vitro*. Abram B. Stavitsky 118
Differences in Susceptibility of Human Blood to Coagulation by Staphylococci. George H. Chapman 119
Proceedings of Local Branches of the Society of American Bacteriologists 121

No. 2, AUGUST, 1945

The Burst Size Distribution in the Growth of Bacterial Viruses (Bacteriophages). M. Delbrück 131
Effects of Specific Antisera on the Growth of Bacterial Viruses (Bacteriophages). M. Delbrück 137
Interference Between Bacterial Viruses. III. The Mutual Exclusion Effect and the Depressor Effect. M. Delbrück 151
Observations of Hemolytic *Escherichia coli* on Blood Agar and Eosin Methylene Blue Agar. Walker L. Loving 171
Further Studies on the Effects of Spleen Extract on Bacteria. Leo G. Nutini, Cornelius W. Kreke, and Sr. M. Petronella Schroeder 177
Penicillin Assay and Its Control Chart Analysis. Lila F. Knudsen and William A. Randall 187
The Significance of Sodium Chloride in Studies of Staphylococci. George H. Chapman 201

Effect of Penicillin on Infection of Guinea Pigs with *Corynebacterium diphtheriae*. Raymond M. Young and George McF. Mood 205
The Occurrence of *Bacillus botulinus*, Types A and B, in Accidental Wounds. Ivan C. Hall 213
Transformation of the *Streptococcus lactis* R Factor to "Folic Acid" by Resting Cell Suspensions of Enterococci. J. L. Stokes and Alma Larsen 219
Human Food Poisoning Due to Growth of *Clostridium perfringens* (*C. welchii*) in Freshly Cooked Chicken: Preliminary Note. L. S. McClung 229
Notes:
Use of Francis' Glucose Cystine Blood Agar in the Isolation and Cultivation of *Sporotrichum schenckii*. Charlotte C. Campbell 233
The Value of Concentrated Human Whole Blood and Agar Cultures for Testing the Coagulating Power of Staphylococci. George H. Chapman 234
Proceedings of Local Branches of the Society of American Bacteriologists 235

No. 3, September, 1945

The Antibody Response of Guinea Pigs to Epidemic Typhus Vaccines of Various Antigenicities. Richard Donovick, Mary Farrell, and Florence Smith 241
Some Morphological Characteristics of Nodule Bacteria as Shown by the Electron Microscope. II. Martha B. Baylor, M. D. Appleman, O. H. Sears, and G. L. Clark 249
Salmonella Cultures Which Resemble the Sendai Type. P. R. Edwards and Alice B. Moran 257
The Bactericidal Action of Bovine Blood for *Brucella* and Its Possible Significance. I. Forest Huddleson, Evelyn E. Wood, Audrey R. Cressman, and G. R. Bennett 261
Studies on Penicillin in Blood. I. The Effects of Serum and Serum Filtrates upon the Growth of *Staphylococcus aureus*. Edward H. Frieden and Chester N. Frazier 279
The Effect of Incompletely Inhibitory Concentrations of Penicillin on *Escherichia coli*. Erna Alture-Werber, Rakoma Lipschitz, Florence Kashdan, and Philip Rosenblatt 291
The Isolation of Hemolytic Streptococci from Throat Swabs. III. The Value of Enrichment Broth Containing Potassium Tellurite and Crystal Violet. Robert M. Pike 297
A Bacteriophage for *Pseudomonas pyocyanea* (*Pseudomonas aeruginosa*). L. Brandon Fastier 301
The Effect of Low Temperature on the Spirochetes of Relapsing Fever. I. The Viability of Four Strains of Spirochetes Stored at −48 Degrees Centigrade. Ruth Lofgren and Malcolm H. Soule 305
The Effect of Low Temperature on the Spirochetes of Relapsing Fever. II. The Structure and Motility of *Spirochaeta novyi*. Ruth Lofgren and Malcolm H. Soule 313
The Nutrition of *Proteus morganii*: Sulphur Requirements. Fred P. Meyers and J. R. Porter 323
α-Hydroxyisobutyric Acid Buffers (pH 2.3–5.0) Not Altered in pH by Mold Growth. Walter C. Tobie and Gilbert B. Ayres 333
A New Fermentation Method for Mycological Identification. F. Raubitschek 337
The Effect of Antibiotic Substances upon Bacteriophage. Doris Jones 341
Some Observations on the Synthesis of Polysaccharides by Soil Bacteria. James P. Martin 349
An Improved Staining Method for Demonstrating Bacterial Capsules, with Particular Reference to *Pasteurella*. Arthur M. Jasmin 361
Microbiological Aspects of Penicillin. V. Conidiospore Formation in Submerged Cultures of *Penicillium notatum*. J. W. Foster, L. E. McDaniel, H. B. Woodruff, and J. L. Stokes 365
Bacterial Collagenase. Marshall W. Jennison 369
Note:
Salmonella veneziana—A New Type. D. W. Bruner and B. J. Joyce 371

No. 4, October, 1945

The Nutritional Requirements of the Lactic Acid Bacteria and Their Application to Biochemical Research. Esmond E. Snell 373
The Interrelationship of Iron and Certain Accessory Factors in the Growth of *Rhizobium trifolii*, Strain 205. Virgil Greene Lilly and Leon H. Leonian 383
The Pyrogenicity of Bacterial Contaminants Found in Biologic Products. Thomas F. Probey and Margaret Pittman 397
Studies on the Death of Bacteria at Low Temperatures. I. The Influence of the Intensity of the Freezing Temperature, Repeated Fluctuations of Temperature, and the Period of Exposure to Freezing Temperatures on the Mortality of *Escherichia coli*. Russell S. Weiser and Clarice M. Osterud 413
Morphology and Nature of the Pleuropneumonia Group of Organisms. L. Dienes 441
The Paper-Disc Agar-Plate Method for the Assay of Antibiotic Substances. Edwin J. de Beer and Marion B. Sherwood 459
The Influence of Changes in Concentration and Temperature upon the Bactericidal Activity of Formaldehyde in Aqueous Solutions. F. W. Tilley 469
The Fermentation of Glucose by Certain Gram-positive, Nonsporeforming, Anaerobic Bacteria. Carl S. Pederson 475
Correlation Between Antibacterial Power and Chemical Structure of Higher Alkyl Ammonium Ions. E. I. Valko and A. S. DuBois 481

No. 5, November, 1945

A New Species of *Cephalosporium* in Madura Foot (*Cephalosporium granulomatis*). Fred D. Weidman and Albert M. Kligman 491
A Study of the Diphtheroids Found in Infectious Bovine Pyelonephritis. E. S. Feenstra, Frank Thorp, Jr., and C. F. Clark 497
The Control of Contaminants in Penicillin Fermentations by Antiseptic Chemicals. S. G. Knight and W. C. Frazier 505
Chemical Changes in Submerged Penicillin Fermentations. H. Koffler, R. L. Emerson, D. Perlman, and R. H. Burris 517
The Effect of Certain Chemicals on Penicillin Production and Mold Metabolism in Shake Flask Fermentations. H. Koffler, S. G. Knight, R. L. Emerson, and R. H. Burris 549
A Method for the Rapid Preparation of Loffler's and Petroff's Media. Alleyne R. Foster and Clarence Cohn 561
Some Artifacts Encountered in Stained Preparations of Tubercle Bacilli. II. Much Granules and Beads. Keith R. Porter and Diran Yegian 563
A New *Salmonella* Type Isolated from Man. L. A. Barnes, W. B. Cherry, and W. A. Myers 577
Toxicity and Antibiotic Activity of Kojic Acid Produced by *Aspergillus luteo-virescens*. Harry E. Morton, Walter Kocholaty, Renate Junowicz-Kocholaty, and Albert Kelner 579
The Identification of *Neisseria gonorrhoeae* by Means of Bacterial Variation and the Detection of Small Colony Forms in Clinical Material. Harry E. Morton and Joan Shoemaker 585
On the Amount of Carbon Dioxide Supplied for the Primary Isolation of *Neisseria gonorrhoeae*. Harry E. Morton 589
The Revival of Organisms Presumably Killed by Phenol. Lawrence H. Flett, Robert C. Haring, Albert F. Guiteras, and Rebecca L. Shapiro 591
A Remarkable Fission Yeast, *Schizosaccharomyces versatilis* Nov. Sp. Lynferd J. Wickerham and Enrique Duprat 597
Note:
The Reactions in Triple-Sugar Iron Agar Produced by Paracolon and *Proteus* Bacilli. Erwin Neter 609
Proceedings of Local Branches of the Society of American Bacteriologists 611

No. 6, DECEMBER, 1945

The Influence of Streptomycin and Streptothricin on the Intestinal Flora of Mice. Dorothy G. Smith and Harry J. Robinson 613
A Broth Dilution Method of Assaying Streptothricin and Streptomycin. Richard Donovick, Dorothy Hamre, Frederick Kavanagh, and Geoffrey Rake 623
Dehydrogenase Characteristics of the Pneumococci. L. L. Bambas 629
Dissociants of Lactobacilli. F. W. Barber and W. C. Frazier 637
The *in Vitro* and *in Vivo* Activity of Streptomycin Against *Hemophilus pertussis*. C. P. Hegarty, Elizabeth Thiele, and W. F. Verwey 651
Acidity Controlling Antisepsis by Weak Acids. G. Ione Huntington and Otto Rahn 655
Diphtherial Toxoid Purified by Absorption. I. A. Parfentjev and M. A. Goodline 661
Biochemical Changes Involved in the Decomposition of Hemp Bark by Pure Cultures of Fungi. W. H. Fuller and A. G. Norman 667
The Isolation of Four *Salmonella* Types from One Carrier. Arnold P. Juenker 673
A Small Jar for Grinding Tissue to Be Used with the Waring Blender. Rachel E. Hoffstadt and Helen B. Tripi 675
The Structure of *Spirochaeta novyi* as Revealed by the Electron Microscope. Ruth Lofgren and Malcolm H. Soule 679
Decomposition of Tartrates by Some Common Fungi. Thressa C. Stadtman, Reese H. Vaughn, and George L. Marsh 691
Assay of Streptomycin by the Paper-Disc Plate Method. Y. H. Loo, P. S. Skell, H. H. Thornberry, John Ehrlich, J. M. McGuire, G. M. Savage, and J. C. Sylvester 701
Sources of Amylase-producing Bacteria. George L. Peltier and L. D. Beckord 711
Proceedings of Local Branches of the Society of American Bacteriologists 715
Index of Authors 719
Index of Subjects 721
